Thermal Perfect Bind Equipment

MULTIBIND®

Finally an affordable desk top thermal binding system designed for general office use and will bind up to 2" worth of documents in 60 seconds. User friendly design eliminates hole punching & binding. U-CAT® Thermal Adhesive for a Perfect Bind, Every Bind!

- Proposals
- RFP Kits
- Product Catalogs
- Training Manuals
- Technical Bulletins
- Consulting Reports
- Insurance Policies and Contracts
- Accounting Reports & Financial Statements

Choose from:
Plain, Transparent,
Hardcase and
Custom Covers.

CASSETTE MASTER®

The Cassette Master is a high-speed automatic document binding machine. Designed to handle large perfect binding document volumes with minimal operator involvement in the binding process. The Cassette Master can bind up to 2,500 perfect bound documents per hour.

EZ BIND

Compact and economical thermal binding system. 60 second binding cycle binds up to 250 sheets. Auto shut off. Built in Cooling rack.

MULTIBIND®

NO MORE PUNCHING, PERFECT BOUND DOCUMENTS AT A PUSH OF A BUTTON...

1. Place sheets in cover

2. Place cover in Multibind®

3. Push button to begin the binding process

4. Let cool for a few seconds & you've created a professional perfect bound book

With a wide selection of print processes and options, BSA can create a thermal cover that will make your documents stand out from the competition.

Binding Equipment

For All Your Binding Projects

Heavy Duty Punches

All of our binding equipment is covered by a 1-year parts and labor warranty. We have a dedicated and seasoned service department that is always available to answer questions.

HD 7700 Ultima

An electric workhorse that punches an average of 45 sheets per lift and comes with the versatility of the patented quick-change die system. This unit features an anti-jam mechanism, 14" maximum punching width and a manual reverse backup.

Punching capacity:

Coil / Wire — 40 sheets
Plastic Comb — 48 sheets
3-hole / Velobind® — 55 sheets

HD 7000 & HD 6500

Electric punches that punch an average of 35 sheets per lift. Both punches provide a quiet, smooth power-on-demand operation, and allow 90 cycles per minute.

HD 7000 - Dies interchange quickly and efficiently by simply flipping two clamping levers and sliding out the die.

HD 6500 - Dies interchange easily by removing two bolts and sliding out the die.

Punching capacity:

Coil — 30 sheets
Wire — 35 sheets
Plastic Comb — 40 sheets
3-hole / Velobind® — 55 sheets

PUNCHING DIES

We offer multiple punching die patterns for the HD 7700, HD 7000, HD 6500, and the OD 4000 and OD 4800 punching equipment. All dies are made with extremely durable, all-steel construction.

Please specify HD or OD when ordering.

*Additional dies available.

Heavy Duty Binding Modules

Modules easily attach to the HD 7700, HD 7000, and the HD 6500 punches as well as the OD 4000, OD4012 and OD 4800 punches.

HC 8000 Wire Closer

This module is configured with stand-alone production feet to provide a separate binding work station, or mount it to an HD series punch for a combined unit.

HD 4470 Comb Opener Module

This comb module comes configured with stand-alone production feet so it functions as a separate comb binding work-station or attach it to an HD series punch for a combined unit.

HD 4170 Rhin-O-Roll Coil Inserter Module

This coil inserting module comes configured with stand-alone production feet so it functions as a separate coil work station or attach it to an HD series punch for a combined unit.

HD 8370 Insert-A-Bind Module

With a 14" binding edge and easy adjustment features, this module inserts and closes 3:1 pitch, Double Loop wire in one easy step. Shown mounted on the HD 7700 Ultima Punch.

APES-14/APES-1477 Paper Ejector & Stacker Module

Handling cover stock, tabs, and paper sizes up to 14" x 14" with ease, this attachable module automatically punches, ejects, and stacks in one simple operation. Shown mounted on the HD 7000.

PAL-M Manual-Paper-Picker

The PAL-M is a manual version of the existing PAL-14. It can be used as a module mounted to an APES or any existing Rhin-O-Tuff vertical punch or even as a stand alone machine.

Office Duty Punches

OD 4012

Punching 25 sheets per lift, this electric punch can do it all: coil, wire, plastic comb and more. With a quiet power on demand punch operation, it performs as a stand-alone electric punch or converts into a complete work-station with the addition of quick change punching dies and attachable binding modules.

Dies are interchangeable with the OD 4000 & OD 4800 punch.

OD 4000

Punching 10 to 12 sheets per lift, the OD 4000 is a sturdy 11" manual punch with interchangeable punching dies. Choose from 1 of 11 standard dies and attach binding modules to the unit to turn it into your complete binding station.

Dies are interchangeable with all OD 4000 dies.

All HD modules can be made to fit on the OD 4000 or OD 4800.

“My company has saved money by handling our own punching and binding. Module options and interchangeable dies offer versatility that makes sense.”

Office Duty Binding Modules

Modules easily attach to the OD 4012 to turn your punch into a convenient, stand alone wire, coil or comb binding station.

Helpful Hint

What binding equipment do I need to buy?

For each type of binding you will need a punch with an appropriate punching die and either an inserter (for coil), a manual binder (for comb), or a wire closer (for wire).

For medium to heavy usage, choose an electric unit to increase productivity. A manual unit will suit lower volume needs. If you do more than one type of binding, consider a combo unit that allows you to interchange dies or modules.

Still have questions? Give us a call and we will recommend the best solution for you.

Coil Equipment

COILMAC-EPI 4:1 Electric Punch & Inserter

Punch and bind documents with 4:1 coil using the CoilMac-EPI. This machine will punch up to 20 sheets of 20 lb. paper easily. The open punching throat allows for longer documents while the electric coil inserter reduces time and costs. Insert coil up to 22mm diameter. This electric punch and coil inserter is ideal for print shops as well as professionals.

3250 CL 4:1 Electric Coil Punch & Inserter

Quickly punch 25 sheets of 20 lb. paper at a time with just the touch of a button. The 3250 CL is stylish and compact, yet energy efficient and quiet. The on-demand punching motor only runs when activated and the self-lubricating dies maintain punching efficiency. The worry-free auto-reverse clears most punching jams and the simple coil roller makes coil insertion trouble free. There is a chip drawer with a see thru window and the 3250 CL even has a 'convenience tray' that includes a document sizer, coil sizer and a place to hold spare coil and crimpers. This machine is perfect for any office.

COILMAC-ECI 4:1 Manual Punch & Electric Inserter

Make coil binding fast and easy with the CoilMac-ECI. The 4:1 manual punch combined with electric inserter makes it ideal for larger volume workloads. Punch up to 17 sheets of 20 lb. paper at one time. With coil selector guide and coil crimpers included, the CoilMac-ECI has everything you need to professionally finish your coil bound documents.

Wire Equipment

WIREMAC Manual Punch & Closer

The WireMac Punch and Bind Combo will both punch and close wire documents. This heavy-duty machine has a 20 sheet single punch capacity. The 14" width punching capacity has open sides to accommodate even wider documents. Close diameters ranging from 3/16" to 1 1/4". Use the master selector to determine correct wire diameter, closing position, depth margin and wire pitch. Available in either 2:1 or 3:1 pitch.

WIREMAC-E 3:1 Electric Punch & Manual Closer

The WireMac-E is an electric punch with a manual wire closer. It will punch up to 20 sheets of 20 lb. paper and will bind 3:1 wire ranging from 1/4" to 9/16" diameter. The open punching throat allows for the punching of longer documents while the color-coded guide indicates the correct punching depth setting for each wire size. Create professional documents quickly and easily with the WireMac-E.

WIREMAC-DUO Manual Punch & Closer

Punch up to 20 sheets of 20 lb. paper of either 2:1 or 3:1 pitch with one machine. While designed for a 14" binding edge, all die pins can be independently disengaged to allow the punching of any size document preventing die-end perforation. Close documents ranging from 3/16" to 1 1/4". Use the master selector to determine the correct wire diameter, closing position, depth margin, and wire pitch.

Comb Equipment

COMBMAC - 24E Electric Punch & Manual Comb Binder

The CombMac - 24E is an efficient 14" machine that produces a professionally finished product. Punch up to 25 sheets of 20# paper per lift with this foot pedal operated electric punch. Evenly center your punching pattern, regardless of the binding edge. This machine's reliable and practical design is the perfect fit for any office.

MEGABIND 1E Electric Punch & Manual Binder

The MegaBind 1E is the electric version of the MegaBind 1. Punch up to 12 sheets of 20 lb. paper with the simple tap of a foot pedal. The side margin control provides an evenly centered punch for all document sizes while the punch margin control adjusts the depth setting for each comb setting.

MEGABIND 1 Manual Punch & Binder

The MegaBind 1 makes comb binding fast and easy. This efficient 14" machine produces a professionally finished product. It has a 14" binding edge with an open-end design to allow for longer documents. Punch up to 20 sheets of 20 lb. paper at once. Use the binding guide to determine the correct comb size to bind with. This machine is the perfect fit for any office.

Velobind Equipment

HBC-24 Manual Comb Binder

The manual binding system binds documents up to 14" long using combs up to 2" in diameter. Teamed with any of our stand-alone punches, this versatile unit will give you precisely bound documents each and every time.

System 3 Pro Velo Binding

State of the art in VeloBind® production, the System 3 Pro offers maximum productivity in a desktop binding system, accommodating documents up to 3" thick.

System 1 Velo Binding

The System 1 is for low to mid volume users. The manual punch and electric hot knife binder will bind documents up to 1" thick.

Tape Binding Equipment

Powis® Fastback Tape Binding

Simple, fast, beautiful. Whether you're binding a personalized presentation or a photobook, every Fastback® bind begins with three fundamental building blocks: a binding machine, an adhesive spine strip and an elegant cover.

Binding machines

The Fastback range uses a revolutionary thermal adhesive bind to create strong, beautiful tape binding, and bookstore-quality hardcovers and paperbacks (perfect binding).

Spine strips

Higher-engineered adhesive strips are the foundation of our more durable bind. There are three principle categories: tape binding strips, Perfectback® strips (for paperbacks) and hardcover strips.

Fastback® Model 20

Wide variety of strip styles and colors to choose from.

With the Powis "Fastback" System, you can create beautifully bound soft & hard cover books, photobooks and documents easily and quickly right in your office.

Fastback® 9

Elevate your documents and proposals. In this environment, it's essential to present your work at its best. Fastback® 9 offers four types of bindings: Strip, Halfback™, Perfectback™, and Hardcover. Whether you own a small company that is looking for a low cost method of binding documents, or you work for a large corporation that wants a way to brand its work, the Fastback® 9 is an excellent choice for all your binding needs.

Binding Supplies

For Every Binding Style

Binding Elements

EZ COIL®

Our plastic coil binding elements are popular for documents that need to lie flat even when opened cover to cover (360°). We manufacture plastic coil in a large variety of colors and sizes to suit your needs. Plastic coil is flexible in nature and withstands the wear and tear that comes from rough handling or shipping and mailing. Plastic coil always springs right back into shape. Looks great on calendars, cookbooks, instruction manuals and more.

Available in 4:1 and 5:1 pitch and 12" and 36" lengths

32 mm	-	50 (12") 100 (36")	1-1/16 "	265

* Thickness includes covers. **Number of sheets is based on 20 lb. bond paper stock

Helpful Hint

What is the difference between 4:1 and 5:1 pitch?

Pitch refers to how many holes per inch a binding element uses.

4:1 pitch means the plastic coil element has 4 loops per inch.

Elements with a 5:1 pitch have loops that are closer together (5 loops per inch).

PLASTIC COMB

This classic binding solution allows for the addition or removal of pages even after the document is bound. Perfect for reports, books, surveys, sales presentations, cookbooks, calendars and more.

The standard length is 19 rings (for an eleven inch binding edge) with custom lengths available.

Custom options shown on page 22.

Plastic Comb Colors:

	Black		Navy
	White		Maroon
	Blue		Red
	Clear		Forest Green

VELOBIND STRIPS

VeloBind® binding strips are compatible with all VeloBind® hot knife systems. We manufacture our strips from top grade polymer for strength and durability. VeloBind® strips are secure, tamper-resistant, permanent bindings with a professional, upscale appearance.

They are used for:

- Financial Reports/Statements
- Engineering Surveys
- Legal/Court Documents
- Education Thesis
- Sales Presentations
- Government Publications

Available in 1" and 2" diameter.

UltraBind Colors:

	Black		Maroon
	White		Navy

1-3/4"	50	1-1/2"	360
2"	40	1-7/8"	425

*Thickness includes covers. **Number of sheets is based on 20 lb. bond paper stock

DOUBLE LOOP WIRE

The premier choice in wire to use in your binding systems, Double Loop wire is available in diameters ranging from 1/4" through 1".

This permanent binding choice creates true lay-flat documents, opened or closed. Used with equipment that punches either a round or square hole pattern and crimps the wire closed. Double Loop wire comes in 11" standard lengths, with custom lengths available.

Double Loop Wire Colors:

Standard Colors

Premium Colors*

*Special pricing and minimums apply to premium colors.

Double Loop Wire Binding Guide

DIAMETER		QUANTITY PER BOX	THICKNESS TO BE BOUND*	SHEET CAPACITY**
PITCH				
3:1	2:1			
1/4"	-	100	3/16 "	45
5/16"	-	100	1/4 "	60
3/8"	-	100	5/16 "	75
7/16"	-	100	3/8 "	90
1/2"	-	100	7/16 "	105
9/16"	-	100	1/2 "	120
-	5/8"	50	9/16 "	135
-	3/4"	50	5/8 "	160
-	7/8"	50	3/4 "	190
-	1"	50	7/8 "	220

* Thickness includes covers. ** Number of sheets is based on 20 lb. bond paper stock

Helpful Hint

What is the difference between Double Loop and 19-Loop wire?

Double Loop wire has more loops per inch than 19-Loop wire. It creates a "fuller-looking" bound document edge.

Double Loop wire comes in 3:1 pitch (32 loops / 11") and 2:1 pitch (21 loops / 11") and uses either square or round hole punching dies.

19-Loop wire uses the same rectangular punch pattern as plastic comb binding.

Covers

For Professional Looking Presentations

DELUXE LINEN COVER

Classy, durable, coated 86 lb. & 11 pt. cover stock with a linen-texture finish.

100 sets per box (200 pieces)

Linen Colors:

CLEAR & FROSTED COVER

The perfect clear cover to visually enhance the first page of your document. Matte finish available in heavy weight only.

100 sets per box (200 pieces).

Choose from three thicknesses: heavy, medium, and light weight.

ELEGANT FELTWEAVE COVERS

Durable 100# stock with an elegant texture.

100 sets per box (200 pieces).

Embossed Colors:

WHITE GLOSS COVER

12 point cover stock. Lustrous, satin gloss finish with a coated surface that wipes clean with a damp cloth. Won't crack or scuff. Available in white only.

100 sets per box (200 pieces).

HEAT RESISTANT CLEAR COVERS

Heat resistant clear covers are designed to be used in any thermal tape binding system without distortion (i.e. Fastback® or AccuBind® machines). They are .007 mil polyester covers 8.5" x 11" with square corners.

100 pieces per package, tissue interleave.

Cover Sizes

CORNER STYLE

Laminating

For Protecting Important Documents

Pouch Laminating

LAMINATING POUCHES

Our pouches assure high quality clear lamination because they are made of the best polyester adhesive composition. Pre-cut in a variety of sizes, our pouches are open on three sides and sealed on one. Simply insert your item into the pouch, place the pouch in a carrier and run it through a pouch laminator.

Pouches are an easy way to laminate menus, covers, maps, certificates, drawings, newspaper articles, charts, diplomas, ID cards, licenses, membership cards, etc.

ADHESIVE BACK POUCHES

Adhesive back laminating pouches (Sticky Lam) are useful for signs and for adhering documents to any surface. Available in 2 thicknesses: 3 mil and 5 mil. Available in letter, legal and menu sizes.

Roll Laminating

ROLL FILM

These premium films, composed of a blend of the highest quality polyester and adhesives, guarantee a consistent, smooth, clear finish. The aggressive co-polymer films activate at lower temperatures. This increases your production speed, and makes even the most difficult jobs manageable.

LamRite 2700

Accommodating film widths up to 27", the LamRite 2700 assures premium 10 mil laminating output each and every time. This commercial production unit is easy to use, runs 1.5 mil, 3 mil, 5 mil, and 10 mil film, has two built in independent LCD readouts, and two independent adjustable heat controls. High on productivity and low on cost this unit is perfect for printers, copy shops, graphic departments, sign shops, and more.

Roll Film (Clear) Standard Sizes

FILM WIDTH	1.5 mil	3 mil	5 mil	10 mil
	HOMO-POLYMER		CO-POLYMER	
9"		X	X	
12"	X	X	X	X
18"	X	X	X	X
25"	X	X	X	X
27"	X	X	X	
LENGTH	500 ft.	250 ft.	200 ft.	100 ft.

1" Core Size Standard: Other roll film available, call for more information

MINIKOTE PLUS

With teflon coated heat shoes, silicone laminating rollers, and a stop/reverse button to prevent wrap-arounds, the MiniKote Plus is a professional, simple-to-operate laminator that delivers up to 9 feet of lamination a minute. Accommodating film widths up to 27", this unit features adjustable slitters to improve production time, variable speed controls, and digital displays for temperature, speed and usage.

120 volt model

- 1.5 mil film
- 3 mil film

EDUCATOR 25" ROLL LAMINATOR

This 25" pressure sensitive electric laminator is ideal for permanently mounting onto card stock, foam board, MDF or rigid PVC board. It will handle board thicknesses up to 0.375" (10mm). This laminator is perfect for sign and poster companies as well as picture framers and photographers. It works for all who need speed and flexibility for mounting and laminating applications.

PROLAM 12" HEAVY DUTY POUCH LAMINATOR

This laminator is a heavy-duty unit designed for versatility and durability. The 4-roller design results in higher quality lamination, and an independent heat/run switch saves wear and tear on the motor. Temperature is easily maintained with adjustable controls and a thermometer for constant monitoring.

Other pouch laminator sizes available.

Index Tabs

For Organizing Records and Presentations

Index Tabs are a must to assure organization in 3-ring binders, and documents bound in comb, plastic coil, thermal and wire.

Designed to work with major copiers (i.e. Xerox® 5090, 5100, Docutech) they are 1/5 cut and stocked in white, clear mylar, and rainbow mylar. Styles are available in several collating patterns pictured below.

When ordering, specify either punched or unpunched and the collating pattern.

Packaged:

- 5 tabs per set
- 50 sets per box
- 5 boxes per carton
- 250 sets (1250 tabs) per carton

Our large selection and variety ensures you will find the index tabs you are looking for. Call us today for advice on which tabs will work with your copier.

Custom cuts available for copier tabs.

STANDARD COPIER TABS

Plain white tabs.

CLEAR MYLAR COPIER TABS

White tab with clear mylar extensions for protection and durability.

RAINBOW MYLAR COPIER TABS

Mylar tab extensions in a rainbow of colors to make files easily identifiable.
