

# DT-55 Thermal Binding System

Create attractive, professionally bound presentations and reports in the convenience of your office. Loose Pages become perfect bound documents in less than a minute.

- Compact stream-line design
- Binds up to 250 sheets
- Visual and audio indicators
- Auto shut-off
- Built-In cooling rack
- No hole punching, tapes or fasteners needed

Simply place sheets inside of the cover and set the cover into the DT-55 Thermal Binding System. 60 seconds later, your document is professionally bound for a lifetime of use. Documents may be edited by just reheating.

## Add Custom Graphics for the Professional Touch

- Offset Printing
- 4 Color Process
- Foil Stamping
- Embossing
- Die cut Windows
- Transparency

The secret behind U-CAT® is that the thermal adhesive and spine are pre-formed during the manufacturing process. This creates a U-shaped adhesive channel that surrounds the binding edge of the document during the binding cycle ensuring a "perfect bound" document every time.
